New York Yankees Win World Series

American League champions swamp National League Cubs, 37 runs to 19, in four straight games.

**Third and Fourth Games played in Chicago
Featured by 45 hits including 10 Home Runs**

**Chautauqua Opens
4-days Engagement
in Oyen Theatre on
Wed. October 12**

A four day fall chautauqua opens in Oyen theatre next Wednesday evening with a musical program by Sorrentino and his Venetian Strollers. On Thursday afternoon Sue Hastings' Marionettes, and in the evening, the comedy "New Brooms" will be presented. On Friday the afternoon and the first half of the evening program will be given by the Empire Trio. The second part of the evening program will be a lecture "On the Bottom of the Sea" delivered by Robert M. Zimmerman. Saturday evening, October 15, the concluding program will be a powerful and beautiful drama "The Mender".

Read the Advs.

The American League champions, New York Yankees, made a clean sweep of the 1932 World series, taking four straight games from Chicago Cubs, winners of the National League. The series was featured by terrific hitting, eighty-two safe hits being made in the four games played, including 11 home runs, (N.Y. 8, C. 3).

FIRST GAME—at New York CUBS... 200 300 220—6 10 1 YANKS. 000 305 31—12 8 2 Batteries—Chicago: Hartnett, Bush, Grimes and Smith. New York: Dickey and Ruffing.

Home run: Gehrig.
SECOND GAME—at New York CUBS... 101 000 000—2 9 0 YANKS 202 010 00—5 10 1 Batteries—Chicago: Hartnett and Grimes. New York: Dickey and Gehrig.

THIRD GAME—at Chicago YANKS 301 020 001—7 3 1 CUBS 102 100 001—5 9 4 Batteries—New York: Dickey, Pipgras and Pennock. Chicago: Hartnett, Root, Malone, May and Tinning. Home run: Ruth 2, Gehrig 2, Cuyler, Hartnett.

FOURTH GAME—at Chicago YANKS 102 002 404—13 19 4 CUBS 400 001 001—6 9 1 Batteries—New York: Dickey, Alton, Wilentz, Moore and Pennock. Chicago: Hartnett and Homsley, Bush, Warnerke, Jakie May, Tinning and Buschlight Grimes. Home runs: Lazzeri 2, Combs, Demaree.

M. D. Golden Centre

The ninth meeting of council of the M. D. of Golden Centre No. 272, was held at the N.E. 1/4 13 30 5, on Saturday, October 1. Members all present except Councillor Jorgenson.

A few appeals for seizures were received and adjustments were made.

Councillor Dahl was instructed to plow fire guard around buildings and cover windows on house on section 23-30-5 4.

The financial statement as at September 29, was read and accepted, and all accounts were paid to date.

Council adjourned to meet on Saturday, November 5, at 10.00 a.m.

Capacity of Canadian Elevators
414,660,260 Bushels. Alberta
Capacity 75,344,200 Bushels

There is a total of 5,872 grain elevators with a capacity of 414,660,260 bushels in the western and eastern divisions of Canada. Of this total 5,734 are country elevators with a capacity of 202,951,100 bushels. Manitoba has 739 elevators with a capacity of 23,751,500 bushels. Saskatchewan has 3,237 elevators with a capacity of 103,855,400 bushels. Alberta has 1,748 elevators with a capacity of 75,344,200 bushels.

For All Who Prefer Quality

"Fresh from the Gardens"

The Sun Is Shining.

As the writer sits down before his typewriter to type out this article, bright sunshine, typical of these beautiful Indian summer days on the prairies, is streaming through the window, while that is invigorating tang in the air which leads one to throw back his head and draw in a lungful. The sun is shining, and in these days when we are all too prone to dwell on the dark side of things, it is well to remember that the sun is still there, shining away as strong as ever, the only difficulty being the clouds that intervene to obscure our vision.

The sun still shines, not only in the actual meaning of the words in the physical world, but in the sense that there is much of brightness and warmth in life itself. Admittedly there are still difficulties ahead for many people, there are very acute problems to be solved, not only by individuals, but by communities and governments. These difficulties must be overcome, and solutions for these problems found, but there is not a very large ray of sunshine indeed in the knowledge that never before in the history of mankind were so many people, including the bestest brains in all countries, devoting their time, their intellects, their energies, to searching out and testing the efficiency of the remedies to be applied. The world knows there is something out of joint somewhere and there is surely comfort and satisfaction in the knowledge that people are not just drifting in the hope that something will turn up to bring about a betterment, but, on the contrary, are tackling the problem from all angles with a view to effecting that betterment and to preventing a recurrence of present difficulties.

Some people, who say as if they believed the sun had been finally and forever blotted out, keep on circulating pessimistic views to the effect that the moral character of man is breaking down, that they are losing their initiative, that, instead of obtaining confidence in themselves and a pride in their own achievements, they are willing to become the mere hirelings of the state. In the prevailing atmosphere of gloom in which many people surround themselves, they see growing up a generation of loafers and criminals. Is this a true picture? If it is, how can one account for such a highly desirable state of things, as reported in the Toronto Globe, that during the recent Canadian National Exhibition at Toronto nearly a million and a half people passed through its gates, and in all that time not one arrest on a major charge was made. As the Globe says this is a remarkable record.

The Globe says further that there were but two fires, and of these a more consequential: further evidence of the commonsense care exercised by dwellers in what for the time-being was a great city exposed to the dangers of pestilence, having been fed for weeks by the workmen.

Trappers who arrived from along the west coast state that ducks and geese flew from the sloughs in thousands a few miles east.

The ducks in this district are chiefly pintails and mallards, with a few teal. To the north and east and west there are large numbers of Pacific divers. They are protected by the rangers so the Eskimos will not run short of food.

Australian Pleased With Radio System

It is Nationally Owned and Working Well Says Bruce

Australia's nationally-owned radio system, now controlled by a commission, five is working well, Rt. Hon. Stanley M. Bruce stated at Ottawa after the Imperial Conference. The leader of the Australian delegation expressed interest in the national broadcasting commission to be appointed to supervise Canadian radio.

Mr. Bruce stressed importance of selecting qualified commissioners and said the entire Australian supervisory body had been chosen because of cultural background, business efficiency and general sympathy with important public movements. He sure you do not let politics play a part in the selection, he advised.

"I do not think any of the Australian commission members were ever mixed up in politics," Mr. Bruce said. Great interest and considerable satisfaction had been expressed with regard to the Australian commission, which acts in an advisory capacity and as a court of final appeal, but does not do the executive work. The commissioners are part-time workers and receive a remuneration of £400 each annually, with £500 for the chairman.

Law Bans Shooting Ducks At Churchill

Port Still Under Construction and No Firearms Allowed

While sportsmen in northern Manitoba banged away at the mallards and teal as they flew south, the hunters of Churchill had to sit still by and watch the birds enjoy the peace and quietude of the closed season. Churchill is still "under construction" and the law says that no firearms are allowed in the camp.

There were hundreds of ducks right in camp. They fed on the grass and weeds from boxes and barrels and choice morsels of vegetation in the sloughs around the camp. They were quite tame, having been fed for weeks by the workmen.

Trappers who arrived from along the west coast state that ducks and geese flew from the sloughs in thousands a few miles east.

The ducks in this district are chiefly pintails and mallards, with a few teal. To the north and east and west there are large numbers of Pacific divers. They are protected by the rangers so the Eskimos will not run short of food.

Prefers North Country

Woman Very Eager To Get Back To Alaska

It's nothing to drive forty miles to a dance in the north country, according to Mrs. Elizabeth Marsh of Iditarod, Alaska, who has been visiting her children at Vancouver.

"The dances are the big social event up north," said Mrs. Marsh. "I've never missed one of them since going up there twenty years ago."

Mrs. Marsh says she never thinks of the cold in the Arctic country. Winter is coming on now, but she is eager to be back in the land where the people are covered with ice and snow most of the year.

After several years at Wrangell, Mrs. Marsh went to Fairbanks by train and then 500 miles by dog sled and afoot over the rocky Iditarod Pass to McGrath at the head of navigation on the mighty Kuskokwim River. For thirteen years she has been living at or near McGrath. She looks after the men's laundry and keeps a store.

Persian Lamb the creator and preserver of beautiful complexion, Tonik is a tonic for the skin, clearing the pores, softening and beautifying the skin.

Had Dual Personality

Amazing Story About British Officer Has Been Revealed

As an officer in the British army during the world war, he was stripped of his rank, degraded before the men he had commanded and sentenced by court-martial to be shot for cowardice.

As a private in the French army, going through the worst fighting during the war, he was promoted to the field for courage and decorated afterwards by Marshal Foch, who described him as "the bravest man I have ever known."

That is the amazing story of a dual personality which has been revealed for the first time by French government department.

This coward-hero, an Englishman by birth, was 19 when the war broke out. He was working in France, and hurried home to join an English regiment.

Shortly after his arrival on the French front, he was involved in an affair resulting in his being charged and convicted of cowardice. On the night faced for the execution the man, who was known as "Petter" and had been wounded seven times, and had been mentioned numerous times for conspicuous bravery.

Recently his real identity was discovered by the French police, and it is hoped that he will be shown mercy by his own government in view of the extraordinary circumstances.

No Clerks Needed

Stores without clerks are to be opened in London. Every sale will be automatic. Customers will simply walk up to the store window, select what they desire, and push their money into a slot press a button and receive the purchase and change immediately. The stores will supply all kinds of proprietary articles, from a box of pills to a pound of tea.

Makes Use Of Steam

The discovery of a new process of extracting valuable minerals from worthless rock without the labor and expense of first pulverizing the entire ore, has been announced by the Dominion Bureau of Statistics.

Alberta came next with 62,420 miles, and Ontario with 52,119 in third position. Other provinces, with their mileages, were: Quebec, 35,763; British Columbia, 22,459; Nova Scotia, 14,719; New Brunswick, 11,825; Manitoba, 5,230; and Prince Edward Island, 3,650 miles. The total highway mileage in Canada is 378,094.

For years Mother Graves' Worm Exterminator has ranked as a reliable worm preparation and it always maintains its reputation.

Eskimos In Canada

Bureau Of Statistics Report Gives Number As 5,979

There are 5,979 Eskimos in Canada according to the census of 1931, and they are located as follows: Yukon, 85; Northwest Territories, 4,670; Quebec, 1,159; Manitoba, 62; Alberta, three. There are 5,116 males and 2,863 females, says a report of the Dominion Bureau of Statistics.

It is impossible to say definitely whether the Eskimos have increased or decreased during the past decade, but the impression is they are increasing.

Bombs sent through the mail may be detected while still in the post office. If a new X-ray inspection device is put into use in the United States.

"Everlasting" oranges, which after ripening turn green again if not put on ice and next year ripen to a better quality, have just been introduced from America into Spain.

Wood Regains World's Speedboat Record

American Pilot Averaged over 134 Miles An Hour

Gay Wood regained the world's speedboat record by sending his "Miss America X" catapulting twice over a measured mile on the St. Clair River at Algoma, Mich., at an average speed of 124.91 statute miles an hour.

The former record, 119.75 miles an hour, was made on Lake Monow, Scotland, July 18 last, by Kaye Don, British speedboat pilot, who tried unsuccessfully to wrest the Harman trophy from Wood.

Wood, after the record-breaking run, said "Miss America X" four 12-cylinder engines had not been under the strain in the effort and he thought the big, mahogany-hulled thunderbolt could go faster. "How much faster, I don't say," he said. "The motor was making 2,500 revolutions per minute. Their limit, with safety, is 2,700 revolutions per minute."

Did Not Heed Warning

Eight Calgary Residents Partially Blind in Recent Epidemic

Eight Calgary citizens have received medical attention for varying degrees of blindness as result of watching the eclipses of the sun by the moon on August 31, without the aid of darkened glasses. It was shown in inquiries made to eye specialists.

While one was almost totally blind in one eye while her other eye is slightly affected. Others suffered severe strain and were partially blind. While some affected persons will completely recover will not be known until treatment is further advanced. Practically all will be receiving attention for three or four months.

Found Their Own Market

Price Offered Did Not Suit Onion Growers Of Brittany

When growers of onions in the vicinity of Roscoff, Brittany, could not get the price desired for the yields of their small farms last season, they formed a syndicate, chartered a small sailing vessel, loaded on 40 tons of onions, and sailed for Scotland, carrying long strings of the onions on their backs they went from door to door in Glasgow and other cities peddling their wares. When the cargo had been sold the powers agreed up and found that they had not sold the vegetables home.

Exhausted From Asthma. Many who read these words know the terrible drain upon health and strength, which comes in the train of asthmatic troubles. Many do not realize, however, that there is one true remedy, which will usually stop this drain. Dr. J. D. Kellogg's Asthma Remedy is a wonderful check to this dangerous ailment. It has a countless record of cures, and its credit. It is sold almost everywhere.

Leads In Highway Mileage

Saskatchewan Heads All Provinces With 155,609 Miles

Saskatchewan leads all the provinces of the Dominion in highway mileage, with 155,609 miles open for traffic on December 31, 1931, according to a report by the Dominion Bureau of Statistics.

Alberta came next with 62,420 miles, and Ontario with 52,119 in third position. Other provinces, with their mileages, were: Quebec, 35,763; British Columbia, 22,459; Nova Scotia, 14,719; New Brunswick, 11,825; Manitoba, 5,230; and Prince Edward Island, 3,650 miles. The total highway mileage in Canada is 378,094.

Russians Cannot Send Food Through Mail

Attempts To Relieve Famine Discouraged by Soviet Government

Henceforth bread, flour, cereals, seed oils and other foodstuffs are to be barred from the mails, the post-office announced.

It is hoped in this way to stop the voluntary and individual attempts to relieve famine which prevails in most provincial districts.

In the past half-year and more the shortage of food has become so serious throughout large areas of the Soviet Union that desperate methods of obtaining bread have been resorted to Moscow and, to a lesser degree, other large cities have been jammed with peasants, filling the train odds and ends of valuable for bread.

The stations swarmed with peasants, each staggering under a heavy sack full of bread, bound back to the provinces and the farms.

Much food has also found its way through the mails. Friends and relatives in the capital have endeavored to relieve the suffering of their dear ones by occasional shipments of food.

Food has not been plentiful in Moscow, but agile dogging about and discreet speculation has enabled many to accumulate a few loose extra or a few pounds of meat of some sort. Now this channel has been plugged. Peasants will henceforth either have to attempt to get aboard already hopelessly overcrowded trains for a personal visit to Moscow—or starve.

Sleep is the great nourisher of sleep, and without peaceful slant the child will not thrive. This cannot be if the infant be troubled with worms. Miller's Worm Powders will destroy worms and drive them from the system, and afterwards the child's rest will be undisturbed. The powders cannot injure the most delicate baby, and there is nothing so effective for restoring the health of a worm-worshiper in infancy.

Achieved Her Ambition

Child Crippled With Infantile Paralysis Learned To Swim

An 11-year-old crippled girl returned to her home in Chicago from a camp this summer happy, for she had achieved the ambition of her short lifetime.

Carmela Jaure, crippled with infantile paralysis since she was born, always had dreamed of the water. This year she learned to swim.

She attended a camp near Burlington, Wisconsin, in the company of 200 other crippled children, all of Chicago.

A Remarkable Forest

Trees Four Feet In Diameter Are Only Feet High

What is believed to be the most remarkable forest in the world has been found on the west coast of Africa. Although the trunks of the trees are as much as four feet in diameter, they attain the height of only one foot. No tree bears more than two leaves, which attain a length of six feet and breadth of two feet. The forest covers a tableland six miles in width.

In earlier days on the earth, there were dragon flies that had a wing spread of two feet.

Twelve hundred and fifty American tourists landed in England during a recent weekend.

French Talking To Tea

Cantons Reports Show Imports Doubled In Two Years

People of France, long noted for their wines, are talking to tea. Customs returns show that during the two years imports of tea have doubled. Moreover, the leaves for the beverage, which formerly came through England, now are shipped direct from India and Ceylon to Marseilles, Havre and Bordeaux. Experts say the change is the result of the improvement of better tea, and the teaching of how to get best results in using the hard Paris water in tea making.

Always At Work

We do not get rid of accidents by protesting; they come out to happen. Let us remember that those laboring Nature by which we sometimes suffer, are always at work, and for our advantage. The ocean waves carry thousands of ships at the very time they engulf one.

The case is reported of a small boy who says his prayers in his sleep. We are reminded of the man who said Grace in his sleep, his wife's name being Anne.

Dickens' Books Popular

Demand For Works Exceeds Supply Says London Librarian

The man who made Christmas—Charles Dickens—is as popular as ever among his countrymen. A London librarian, discussing what the public reads, has revealed that Dickens' works are demanded more frequently than they can be supplied. Scott, however, seems to be out of favor. Dickens also figures in a list of the thirteen books most widely read by girls over twelve in another public library. It includes "David Copperfield" and "The Old Curiosity Shop." Boys are sick of the old favorites, but they actually prefer books in which the flavor of adventure is strong. The Robinson Crusoe, "King Solomon's Mines," "The Swiss Family Robinson," and "Treasure Island" are well up on the list. But, of course, certain of the classics have been prescribed by teachers for home reading, and that may boost up the demand for them.

Cub Reporter—"I'd like some advice air, on how to run a newspaper." Editor—"You've come up wrong among the cub reporters."

All Her Children Were Troubled With Diarrhoea

Mrs. J. J. Dickler, R.R. 1, Enderby, B.C., writes—"Last Summer all my children were troubled with diarrhoea, and were so I did not know what to do. A friend told me to give them Dr. Enderby's Baby's Wild Strawberry, so I got a bottle, and after a couple of doses you soon have seen the change. The children were soon well again, and I am very thankful to your wonderful remedy. I find it the only one that relieves so easily and quickly."

DR. ENDERBY'S BABY'S WILD STRAWBERRY

STATES NOTIFIED GERMANY CANNOT MEET PAYMENT

Washington, — Germany formally notified the United States that she would have to postpone the \$7,500,000 payment which fell due under its debt funding agreement, September 30.

In announcing the postponement, Secretary of the Treasury Ogden Mills disclosed that on application by the German ambassador three months ago, he had waived the 90-day notice of intention required for such action. Provision for waiver on the part of the United States was written into the funding treaty.

Mills said inability to obtain the necessary foreign exchange was the reason given by Germany for the postponement.

The payment due under the mixed claims section of the funding agreement amounts to \$4,800,000, and is postponed for two years at 5 per cent. The American army of occupation costs, accounting for the balance, are postponed two and one-half years and carry interest at 3 1/2 per cent.

The secretary said no similar situation has arisen with any of the other debtor nations which altogether must meet payments of \$123,500,000 on December 15, unless action is taken to postpone them. The balance of Germany makes a total of \$9,002,000 in debt payments postponed this year.

Estonia, Latvia and Poland served notice on September 15 that they would be unable to make payments of \$1,252,000 due on December 15.

Inquiry Made At Work

Unfolding Mystery Of Loss Suffered By Manitoba University

Winnipeg, Man.—A board of inquiry is slowly unfolding the mystery which envelops the loss of nearly \$1,000,000 in endowment funds of the University of Manitoba.

Less than five hours' investigation by the board revealed that the university had not been completely audited in the last eight years, that no report had been tendered as to the condition of investments; that the board of governors had failed to comply with the statutes of the institution; and that John A. Macbray, vice-chancellor, had been guilty of errors and omissions, contrary to the University act.

Pension Plan For Postmasters

Would Affect Only Those Receiving Under \$5,000 Annually

Montreal, Que.—At the opening session of the first annual convention of the Canadian Postmasters' Association, Quebec branch, C. D. Griffith, Estevan, Sask., outlined a superannuation plan for postmasters, which had been drawn up by a committee, of which he was a member. Appointed by Hon. Arthur Saupe, Postmaster-General. The plan provided for contributions to annuity funds to be made, half by the government and half by the postmasters. It would affect only those postmasters receiving under \$5,000 annually, and those who receive more would come under the civil service pension scheme.

Honor Memory Of Parker

Bellefleur, Ont.—The body of Sir Gilbert Parker, Canadian-born novelist and statesman, now rests by the side of that of Lady Parker, in a private mausoleum in Bellefleur cemetery, near East Camden, his birthplace. Representatives of every walk of life paid tribute to the memory of one of Canada's most brilliant sons at the funeral.

Laborers Pay Railed

Winnipeg, Man.—City council has made its first upward pay revision. A motion to increase wages of common laborers from 40 to 42½ cents an hour was passed by council on a vote of nine to eight.

Riot Reports Denied

Moscow, Russia.—The Soviet government denied reports that 100 Soviet workers were killed in food riots at Sverdlovsk. No riots took place at all, it is said, and the reports were characterized as "more Riga fabrications."

Veterans Want Five-Day Week

Seattle, Wash.—The Ontario command of the Canadian Legion in command here prepared to forward to the Dominion government and to the Dominion Government a resolution favoring adoption of a five-day week and a six-hour working day.

W. N. U. 1562

Attempt Assassination Of Calcutta Editor

Two Men Commit Suicide After Plan Failed

Calcutta, India.—Two men committed suicide by poison after failing in an attempt to assassinate Sir Alfred Watson, editor of the Statesman, a daily newspaper.

Sir Alfred was shot in both shoulders, a large park-like area in the heart of Calcutta. A third member of the group that tried to kill him escaped. Police found the automobile they used abandoned outside the city. One of the bullets struck his chauffeur, who was seriously wounded, and another grazed the hand of Mrs. Rose Grosse, his secretary.

Frequent threats against the life of Sir Alfred have been made by extremists who objected to the policies of his newspaper. Last August an attempt was made to kill him, but he escaped unharmed.

Not Much Space Left

Small Area In Building Unfilled For Grain Show

Regina, Sask.—Two-thirds of the available space in the new building at the exhibition grounds to house the World's Grain Show next year has now been applied for.

Officials of the exhibition stated that the latest application for space in the building has been received from the Board of Grain Commissioners for Canada which body proposes to make up an exhibit of grain in the building at the time of the world's cereal show next year.

The exhibition of the grain commission will occupy a space of 1-500 square feet with 100 feet frontage. The main feature of the exhibit will be a demonstration of Canadian grain grades and the influence of hard red spring wheat when milled with the soft wheat of Europe upon the quality size and color of the bread loaf.

'Planes Damaged By Storms In North

Aviators Carrying Supplies To Subarctic Have Hard Time

Churchill, Man.—Fleets of gales which swept the coast of Hudson Bay, made life for aviators carrying supplies to the subarctic a very difficult task. The heavy fog and delayed grain boats bound for that port, played havoc with the three Canadian Air Force Junkers planes, freighting from Eskimo Point to northern outposts. It was learned here.

The "Ju," heavy freighter, sustained serious damage to the pontoons and another of the Junkers "planes" was out of commission for months. During the past months' misadventures have dogged the footsteps of aviators freighting supplies to the subarctic, and fears are now entertained that food supplies may be running low at some points.

King Pledges Party To Lower Barriers

Liberal Leader Claims High Tariffs Stifle Trade

Exeter, Ont.—Declaring the development of Canadian industry and commerce had been thwarted and to a large measure paralyzed by the "excessively high tariffs, enacted by the present administration," Rt. Hon. W. L. Mackenzie King, leader of the Liberal party, pledged his party to continue to seek the promotion of trade by the lowering of tariff barriers. Speaking on behalf of W. H. Golding, Liberal candidate in the South Huron by-election which wound up with polling on October 3, Mr. King strongly criticized what he termed attempts of government spokesmen to make the imperial economic conference the issue in the contest.

Protest From Veterans

Calgary, Alberta.—Alberta command of the Canadian Legion is making strong protests to the Dominion Government because a civilian released the postmaster's post at Canmore, about 60 miles west of Calgary. S. G. Pettie, Alberta secretary of the legion, stated an ex-serviceman, W. G. Jones, was given the appointment at first but later was turned down in favor of a civilian.

Threats Cause Anxiety

Tokyo, Manchuria.—There is some anxiety here regarding the fate of 200 Japanese residents in the Manchou and Hsiao districts going to be on a strike of Chinese railway guards who are reported to be planning to kill all the Japanese they encounter.

Canada Unlikely To Enter Speedboat Race

Would Be Difficult To Conform To Harmsworth Trophy Rules

Detroit, —W. D. Eldenburg, chairman of the race committee of the Yachmen's Association of America, said he doubted whether Canada could put an entry into next year's speedboat races for the Harmsworth trophy and the world's championship.

Mr. Eldenburg quoted rules of the association to the effect competing boats must be designed by natives or naturalized subjects of the country from which they are entered and must be constructed wholly and in every respect in that country.

Bert Hawker, of Gravenhurst, Ont., boat designer who drove Miss Betty Cartwright's entry in the general council of the United Church of Canada, was mentioned in an announcement from Orillia, Ont., as the designer of a boat which an Orillia syndicate was considering entering in the 1933 races.

Construction of an engine of sufficient power to make its boat conform in the race would cost the Canadian syndicate about \$250,000, Mr. Eldenburg estimated.

HURRICANE LOSS AT PORTO RICO IS VERY HEAVY

San Juan, Porto Rico.—More than 200 persons were killed and at least 1,000 were injured in the hurricane which swept across Porto Rico, Governor James Beverley estimated after receiving casualty reports from police authorities.

The governor told an emergency relief committee of San Juan citizens that the total dead and injured probably would be revised upward instead of downward when additional reports had been received.

The committee was organized pending a direct appeal to the United States Red Cross for badly needed assistance.

Starting shortly before midnight, a 120-mile wind lashed San Juan and the hinterland, wrecking buildings, ripping the roofs from houses, blowing down their side walls, and ruining the valuable citrus fruit and coffee groves.

Loss in the fruit crop alone was estimated at \$7,000,000. After a personal inspection of part of the area of devastation, Governor Beverley said the damage to the coffee crop would be even greater.

When the storm left Porto Rico and headed westward toward San Domingo, communications in the island had not been restored. It appeared probable that when all outlying points had been heard from the death toll would be considerably higher.

Work of relief and repair got under way in such confusion that it was impossible to determine how high the number of injured would be, but it was apparent hundreds had been hurt. Thousands of persons were left homeless.

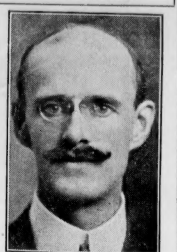

The storm put San Juan's water and light facilities out of commission. A new transmission line must be built before power can be furnished for pumping water six miles from the reservoir. Arrangements for a temporary water supply, imperative for reasons of sanitation, were being rushed.

GLORIA'S HUSBY IN FILM DEBUT

Photographed in a little corner of England's Hollywood, just outside London, England, Gloria Swanson (extreme right) is shown casting critical eye on a scene in which her husband, Michael Farmer, is acting with Genevieve Tobin before the movie camera. It was Farmer's first experience as an actor and he appears in the picture as Miss Tobin's husband.

NEW PRESIDENT

W. W. ROSS

of Montreal, who has been elected president of the Canadian Chamber of Commerce, succeeding Col. W. L. McGregor, of Windsor, Ontario.

New Moderator Elected

Dr. T. A. Moore Appointed Head Of United Church

Hamilton, Ont.—Rev. Dr. T. Albert Moore, secretary of the general council of the United Church of Canada, was elected sixth moderator of the church by the general council in session here.

The election was contested by Rev. Dr. Richard Roberts, pastor of Sherbourne Street United Church, Toronto, and by Rev. Dr. W. A. Armstrong, Trinity United Church, Toronto.

Secretary to the general council of the church since the union, Rev. Dr. Moore was for many years previously an outstanding figure in the Methodist Church.

A native of Acton, Ont., he began his career as a printer and publisher there. Turning to the ministry he was ordained in 1884 after completing his studies at Wesleyan College, Montreal.

Opens New Museum

Hon. J. F. Bryant Officially At Ceremony In Prince Albert

Prince Albert, —Hon. J. F. Bryant, Minister of Public Works, officially opened the new Prince Albert historical museum in Bryant Park.

The building which will house the historical relics is one of the first structures to have been built here. It was erected by Rev. James Nisbet and members of his party who landed here in 1886. For years it stood, gradually rotting away, until last year it was taken down and rebuilt in the park which is named after Mr. Bryant's father, a former resident here.

Train Schedule Now Eliminates Long Stop

C.N.R. Continental Limited Has No Lay-Over At Winnipeg

Montreal, Que.—Eliminating the present 10-hour lay-over at Winnipeg, the new schedule of the Continental Limited between Montreal and Vancouver became effective with the departure of that train from Montreal and Toronto on the night of Friday, Sept. 30. It was announced by the Canadian National Railways.

The new schedule became effective Saturday, October 1, and eliminates a 10-hour lay-over at Winnipeg.

Student Flyer's Death Caused By Accident

Parachute Used By Winters Properly Packed Student Instructor

North Battleford.—After brief deliberation, the jury inquiring into the death of Charles J. Winters, Wildlife flying student, who crashed to his death when his parachute failed to open, returned a verdict of accidental death. No riders were included in the verdict.

Chief evidence was heard from George Bennett, R.C.A.F. instructor who has been instructing flying club students in the art of parachuting.

Bennett told the court he had made 1,086 jumps during his career and in only one instance had it been necessary to use the emergency chute. He had trained between 300 to 400 students, he stated. He voiced the opinion that Winters had taken off the wing of the plane in a somewhat and had become entangled in the harness, causing the chute to stay closed. He stated definitely that the parachute was properly packed.

New Gold Find Reported

Engineers Consider Discovery In Beaver Lake District Important

The Pas, Man.—What engineers consider an important new gold discovery in the Beaver Lake district of northern Saskatchewan, just over the Manitoba border, west of here.

Some 250,000 ounces of gold reaching here are said to be heavy in gold, and 40 men are already working in the neighborhood with prospects of continuing the work throughout the fall and winter.

ELEVEN MEMBERS RESIGN FROM BRITISH CABINET

London, England.—Denouncing the whole policy of the Imperial Economic Conference at Ottawa as "imperialism," 11 members of the British cabinet ministers resigned from the cabinet.

"To be sure, these trade questions under the forefront of the political and economic measures," declared the joint letter, in which two Liberal cabinet ministers and eight other Liberal ministers, not members of the cabinet, submitted their resignations.

Viscount Snowden of Epsom, having severed 40 years' close association with Prime Minister Ramsay MacDonald, was outspoken in denunciation of the proceedings at Ottawa and the agreement resulting, as he resigned from the cabinet in company with Sir Herbert Samuel, home secretary, and Sir Archibald Sinclair, secretary for Scotland.

"I am convinced," Lord Snowden wrote to the prime minister, "that the present 10-hour lay-over at Winnipeg, the new schedule of the Continental Limited between Montreal and Vancouver became effective with the departure of that train from Montreal and Toronto on the night of Friday, Sept. 30. It was announced by the Canadian National Railways.

The new schedule became effective Saturday, October 1, and eliminates a 10-hour lay-over at Winnipeg.

Replying to the declarations which accompanied their resignations, the prime minister declared the task of the National government was not yet completed; that it must be completed.

In a statement issued over his name and that of Sir H. H. Thomas, dominions' secretary, and Lord Simon, Lord High Chancellor—National Laborites—Prime Minister MacDonald declared:

"We put our hands to a very big job 12 months ago. The same determination to disregard all ordinary partisan methods which we showed then we show still. The work is not finished and it cannot be finished until, one way or another, there is a reparations and debts settlement, and there is a world economic conference, and we must go on with this things are done."

"We make the same appeal to the electors," the Prime Minister added, "as we did 12 months ago—that the nation needs a non-party government, and that purely party considerations are the enemy of our national influence in the world and would be a blow at the movements now at work towards world recovery."

SCRIPT IDEA HAS PROVED SUCCESS IN ALBERTA TOWN

Calgary, Alberta.—By enabling citizens of Raymond to pay off more tax arrears than ever before in the town's history, the local success of the council in issuing script in payment of local indebtedness has been brilliantly vindicated.

Reports show a remarkable increase in tax payments of \$11,000, increased business tax receipts of \$3,200, higher water collections and improved receipts in all departments.

The town has also been enabled to pay its debentures as they became due, no money is owed the bank on current borrowings for loan finance, and in addition the council has been able to reduce borrowings of 1931 by several thousand dollars.

Faced by acute financial problems at the beginning of the present year the revolutionary step of issuing its script in payment of the security of the unpaid taxes of the district was undertaken by the council in face of considerable opposition. Warrants were issued for the payment of various kinds and tradesmen in the district gave their willing co-operation to the scheme by accepting the script at its face value.

All the script was guaranteed redeemable in cash on January 15, 1933, or it could be used any time in payment of rates and taxes.

Good Market In Ontario

Would Buy Alberta Coal If Freight Reduced

Ottawa, Ont.—With a \$5 freight rate to Ontario, Alberta coal could capture a market of from 300,000 to 400,000 tons more than is now being sold here. This was the contention of Alberta in the hearing before the railway commission.

The hearing was in connection with fixing the out-of-pocket cost to the railways in the cost movement from Alberta to Ontario in 1933. At present the shipper pays a rate of \$6.75 a ton and the difference between that and the annual rate the railways receive is made up by the Dominion government. Last year that difference was \$1,000,000.

Cruisers Carry Aid To Earthquake Victims

Sufferers In Greece Welcome Food and Medical Supplies

Athens, Greece.—Arrival of five cruisers of the British eastern Mediterranean fleet, bringing food and medical supplies for relief of sufferers from the earthquakes that have shaken Greece, was hailed here with enthusiasm.

In the meantime the quakes continued and it was feared the casualties would be greater than originally supposed. The number of dead was placed at 200 and the injured at 400. In parts the ground sank eight feet during the main earthquake.

Increase In Deportations

To Countries Other Than British Empire and United States

Ottawa, Ont.—During the fiscal year 1931-1932 which ended March 31, 1932, the number of deportations from Canada to countries other than the British Empire and the United States increased over those of the preceding year by 152 per cent. A more moderate jump of 37 per cent in the number of deportations was recorded. Of the total deportations, numbering 7,025 in the last fiscal year, no fewer than 4,507 of those deported were sent out of Canada because they became public charges.

Supporting Premier's Scheme

Victoria, B.C.—Nanaimo Conservative Association is the latest branch of government supporters to approve of Premier Tupper's stand in favor of union government. Since the premier was criticized and asked to resign by a number of local Conservative bodies in the province have rallied to his support.

More Telegrams Received

Montreal, Que.—An increase of 17 per cent in messages carried during the last two weeks of August, compared with the first two weeks of the same month, is reported by the Canadian National Telegraph. Telegram communications are regarded as the "nerve centre of the country" and the report is taken as being a sign of improvement.

Dawning Of A New Era

Fifty Years Ago Edison Saw Possibilities Of Electricity

When the lights of fifty-nine customers were turned on exactly half a century ago in a square mile of downtown New York Edison declared that the occasion marked the transition from one epoch to another. At the time the observation was attributed to the natural enthusiasm of an inventor in his thirty-fifth year, the sort of flourish that one expects at the completion of any public enterprise. But now that the fiftieth anniversary of his greatest achievement has been celebrated it is evident that he saw more clearly than any of his contemporaries how electricity would transform society. Trolley cars and subways instead of horses, Edison lamps in place of kerosene and gas, motors driving everything from sewing machines to battleships, energy on tap everywhere, like water—now a new epoch had indeed dawned when the switch was thrown in Pearl Street on September 4, 1882—New York Times.

Dogs Aid Snugglers

Show Extraordinary Cleverness In
Bravado Spanish Coastguards

Spanish coastguards have to face a new enemy in the form of cleverly-trained dogs used to smuggle contraband ashore from boats, according to General Soter Pacheco, of the Corps of Carabineros, in a statement made to a Madrid newspaper.

The general says: "The extraordinary way these dogs work. When they see a carabiniere they change their direction, and instead of making a sound, on reaching the shore they do not shake themselves, as dogs usually do, but set off at full speed to their destination. Never less than many of them are at all times." The dogs carry the contraband in bundles wrapped in waterproof material and strapped to their backs.

Feature At Chicago Fair

Women's Importance Will Be Fully Recognized At Exposition

Contributions of women to the social and economic life of the world during the last 100 years will be fully represented at the 1933 Century of Progress Exposition.

There will be no special women's building, because "woman's position in the economic and social world has become too important to be isolated in a special building," officials in charge of arrangements declare.

Plans are also being pushed for the International Congress of Women that will be held in conjunction with the exposition.

Greek To Him

An oculist was examining the eyes of a patient and had requested him to read the top line of a test card, the letters of which ran H P R T V Z B P H K.

"When some moments elapsed, the oculist said: 'Do you mean to say you cannot read letters of that size?'"

"Oh, I can see the letters all right," replied the patient, "but I can't pronounce the blooming word."

An Envious Position

Red Deer, Alberta, after three years of depression, can show an enviable financial sheet. It has a balance in the bank of \$41,000 which is \$7,000 more than last year, and sufficient funds to meet an \$18,000 debt on October 1, with a nice nest egg for the future.

Completing Survey

A survey of the town of Churchill, Man., will be completed this autumn for the purpose of laying out the residential area of the townsite in preparation for settlement next year, according to Hon. J. S. McDermid, Manitoba Minister of Natural Resources and Industry.

Two factories just started in Norway will produce pencils and lighting rods.

"Now we are engaged, I must confess that I have an uncle in prison."

"That's all right. All my uncles ought to be in prison."—Vart Hoen, Stockholm.

Princes Not Exempt

Even princes are not exempt from carelessly leaving "a lot of little things" which others may pick up. The Duke of Gloucester lost his suitcase, pilfered from a car, temporarily unattended, being driven in the snow at London, England. It did not contain anything of very great value.

A Musical Genius

One Armed Pianist Gives Remarkable Performance In London, England

A musical genius of only one arm achieved a great triumph at Queen's Hall, London, as a pianist. It was at a grandiose concert and the artist was Paul Wittgenstein, who was an Austrian soldier in the great war, received a wound which necessitated the amputation of his right arm. It was the first performance in England of a novel work, namely a piano concerto, the solo part having been written for this handicapped pianist.

A writer in the News-Chronicle says of the one-armed pianist: "One scarcely knows whether to admire more the courage or the resource of this musician. Finding himself disabled by the loss of an arm, Wittgenstein's first step was to commission the leading German composer of the day, Richard Strauss, to write for his exclusive use a work for piano and orchestra with a solo part playable with one hand."

"This single work and the remarkable story associated with it took Paul Wittgenstein round the world and established his reputation. He has followed up that commission with others, and the concerto, played in London, England, is the result of a similar deal with Ravel, the Basque composer."

Two Seamen Killed

On French Submarine

Thirty Also Injured In Explosion

An explosion aboard the new French submarine "Perseus," during a trial run off Cherbourg, killed two seamen and injured 30 others, three of them critically.

Six more were seriously burned and 22 suffered minor injuries or burns, or both.

Most of the injured were from the French naval cadets and were aboard for the trials. They were burned while putting out the fire.

The "Perseus" is of the same type as the submarine "Prometheus," which sank off Cherbourg last July with a loss of more than 30 lives.

Height Of Tower Changes

Edif. Structure Expands and Contracts According To Heat

The Eiffel tower, still slim and trim after 22 years of age, has been found to grow larger and broader. Increased its height from 50 to 75 centimeters during the French days and the excessive heat caused the steel structure to expand. When cold winds blow the tower shrinks below its normal 300 metres, due to contraction. The head waves from side to side as much as ten feet, but, like the Goddess of Liberty in New York harbor, whose head is empty and who sways noticeably from side to side, the Eiffel tower is perfectly safe.

Figures Are Confirmed

Professor Piccard Reached Height Of Ten Miles In Balloon

Prof. Andre Piccard and Max Cosmo, both Belgians, reached a height of 16,200 metres (10 miles, 117 yards) in their world balloon ascension of last August. It stated in an official report by the Swiss Aero Club, received at Brussels, Belgium.

Though slightly below the height of 15,000 metres claimed by Professor Piccard, the official figures showed they ascended higher than any other human being, and exceeded the record of slightly under 10 miles made last year by the professor.

True To Form

They were in the club and the conversation turned to Scotland.

"From my experience," said Brown, "I've found it best to take the stories about Scotland with a pinch of salt. For instance, I once knew an Aberdeenian who gave me a 22-carat gold ring in the street. The old bouncer at once put a big display advertisement in a local newspaper. He stated that all the owner had to do was to pay for the advertisement."

"Well, that was certainly very decent of him," put in Smith.

"Yes, I suppose it was," replied Brown, "but that isn't the point. The Scotsman was the editor of the newspaper."

Princes Not Exempt

Even princes are not exempt from carelessly leaving "a lot of little things" which others may pick up. The Duke of Gloucester lost his suitcase, pilfered from a car, temporarily unattended, being driven in the snow at London, England. It did not contain anything of very great value.

CANADIAN AVIATOR TO FLY TO MOSCOW

Captain Errol Boyd, only Canadian to fly over the Atlantic Ocean in a non-stop flight, has announced his intention to take off from New York for Moscow as soon as the weather is right. By taking this line of flight Captain Boyd hopes to break the long distance non-stop record now held by John Russell Boardman and John Polando on their flight to Turkey. Above are pictures of Boyd and his plane.

Near-Gold Dinner Service

Made In Sheffield As Job It Created Immediate Demand

Would you like a gold dinner service, story associated with it took Paul Wittgenstein round the world and established his reputation. He has followed up that commission with others, and the concerto, played in London, England, is the result of a similar deal with Ravel, the Basque composer.

Curiously enough, the new "gold" is made in Sheffield, the city of steel. The first just-like-gold dinner service was made as the result of a joke. Messrs. W. Turner and Co. had been experimenting for some time with a new alloy of aluminum and bronze which has all the appearance of good red gold. "Why not make poor men feel like millionaires?" someone suggested, and for a jest the first near-gold dinner service was made. To the surprise of the firm it aroused an immediate demand. People liked the idea of eating off gold, and the new metal was put to work after, since it is almost stainless.

The biggest demand, though, is likely to come from South America and other Latin countries, where there is a deep love of gold itself or of metal that looks like it.

Work Is Made Easy

Poultry Raisers Can Have Many Labor-Saving Devices

Raisers are numerous. By pulling a rod all the windows on a thirty-foot section of a shed can be made to open or close at one time. Poultry food is not carried into the houses. It is brought alongside by motor-lorry; then a small door in the wall is opened, a hopper drawn out, and the food tipped straight into it. It falls into a container inside the house. All other houses are supplied with fresh water, which is kept during the winter at a temperature of forty to fifty degrees Fahrenheit by electricity. From October to February, to increase egg production, the birds' feeding light is kept at fourteen hours. Electric light is switched on and off by time clock morning and evening. The poultry food is mixed on the premises in a giant blender. It is given to the birds in the form of a milky ration, of which they consume nearly 200 tons a week.

Saving Wet Wheat

Grain Can Be Dried Without Damage To Quality

Artificial drying of wheat in Canada has now been practically perfected by the National Research Council's Associate Committee on Grain Research. Losses of crop ranging from 28.6 to 50.8 per cent. and cash losses totalling millions of dollars were sustained by Canadian farmers in recent years through tough or damp grain. The latter may now be dried without damage to its milling and baking quality through the efficiency of commercial driers. Experimental work is being continued to include processes for the drying of barley and other coarse grains—Department of Agriculture, Ottawa.

A Great Combination

Judge—"How fast were you going Sambo?"

Sambo—"Tolable fast."

Judge—"Thirty miles an hour?"

Sambo—"Yessah. Ah wuz goin' moh dot. Ah, yassah. Ah wuz goin' moh dot 40 miles an hour. Ah, yassah. Ah wuz goin' 70 miles an hour. Oh, yassah. Ah wuz goin' 70 miles an hour, yassah. Yassah."

Judge—"What kind of a car were you driving?"

Sambo—"A Ford, Model T."

Judge—"Preposterous, you could not go 70 miles an hour in a Model T Ford. That's impossible!"

Sambo—"Oh, no, sars. Taint impossible stah. Ah always makes mah 70 miles an hour in dat car. Dis is a special kind of Ford, Judge. Dis cah has got a Ford body, a Packard chassy, an' a Pierce-Arrow glands."

Service In Yorkshire

Machine Carried Camera Men Anxious To Get Pictures

The press photographer who takes his pictures from an aeroplane has got himself into bad odor in several parts of England. A special Sunday service was held in the ruins of Fountains Abbey, in Yorkshire, as a commemoration of the 500th anniversary of the founding of the abbey. The service was attended by the Duke and Duchess of York. It was a perfect day for a celebration held in such wonderful surroundings. Yet the words of the Bishop of Hereford were almost drowned by the roaring of an aeroplane conveying press photographers, which persisted in swooping down over the ruins.

Something very similar happened during the pontifical high mass in Phoenix Park, Dublin, Ireland, at the eucharistic Congress. An aeroplane intruded at the most solemn moment.

Motored Farms

Some Interesting Figures From Dominion Bureau Of Statistics

From the current issue of the "Economic Annals," official organ of the Dominion Agricultural Economics Branch, the following figures are taken:—"From a recent report of the Dominion Bureau of Statistics we learn that there were 321,306 automobiles on the 728,623 farms in Canada; about eighteen thousand farmers reported more than one car. There were 48,402 trucks, 105,059 tractors, 75,590 threshing machines and 8,925 combine. Electric motors numbered 18,826 were found on 14,638 farms."

Opinion Was Divided

"You say you are the sole support of your mother, your father having been killed recently in an explosion. How did the explosion happen?"

"Mother says it was too much year, but Uncle Jim thinks it was too little sugar."

Still Going Strong

Thousands of human generations as old as ours, have been swallowed up of Time, and there remains no wreck of them any more. Arcturus and Orion and Sirius are still shining in their courses, clear and young, as when the Shepherds first noted them.—Carlyle.

Condensed Milk Exports

Exports of Canadian condensed milk in July registered an increase of 33 per cent. over July, 1931, exports of evaporated milk were practically doubled and milk powder exports increased by 27 per cent.—Department of Agriculture.

Thirty-Nine Countries Listed

Number Entered So Far For World's Grain Show

Thirty-nine countries, provinces and states are listed at the present time as officially participating in the World's Grain Exhibition and Conference to be held in Regina, July 24 to August 5, 1933. Countries, provinces and states participating as at the present time are: Belgium, Czechoslovakia, Estonia, France, Germany, England, Scotland, Northern Ireland, Wales, Holland, Italy, the Netherlands, Poland, Spain, Switzerland, Yugoslavia, the Union of South Africa, Algeria, Tunis, India, Japan, the Philippines, Australia, New South Wales, New Zealand, Siam, the Jewish Colonization Association for Palestine, the Argentine, Peru, Chile, several states of the American Union, the United States Federal Department of Agriculture, Guatemala, Mexico, the Norfolk Islands, Burma, the nine provinces of Canada and the Canadian Federal Department of Agriculture. All of these will participate either by way of sending official delegates or entries in the competitive classes or by national exhibits.

Canada's Grain Elevators

Greatest Number Of Them Are In 'Country Districts'

There is a total of 5,872 grain elevators with a capacity of 414,660,200 bushels in the western and eastern divisions of Canada. Of this total 5,724 are country elevators, with a capacity of 192,238,000 bushels. Manitoba has 123 elevators with a capacity of 103,855,400 bushels. Alberta has 1,748 elevators with a capacity of 75,344,200 bushels.

Sheep Was Novelty

When an aeroplane, zooming low overhead, vied for attention with a truck speeding through Red Wing, Minnesota, with its cut-out open, no one paid any attention to the noise. Two minutes later a sheep, being carried in a second truck, began to bleat. Traffic was tied up and business was at a standstill as clerks and office workers ran out to treat or learn from windows to see the cause for the excitement.

First June Bride—Oh, a joint bank account must be nice.

Second June Bride—Yes, it's a lovely arrangement. My husband deposits the money and I draw it out.

Friend—How dreadful! The train in which you were travelling actually crashed into the waiting room!

Mrs. Newrich—Yes, and the third-class waiting room, of all places!

Passing Of "Old Bay Store"

Historic Building In Winnipeg Is Demolished By Wreckers

Steeped in an atmosphere of pioneer days, the "Old Bay Store," a direct lineal descendant of old Fort Garry, is disappearing. Yesterday the merry shouts of Hudson Bay fur traders echoed about its walls. And it is demolished, in the interests of economy.

The old landmark was built in 1851 at the junction of the Red and Assiniboia Rivers, 143 years after Pierre Gaultier de Verennes, Sieur de la Verendrye had founded it. It was the future city of Winnipeg. Its site was of stone taken from old Fort Garry and facing bricks used in its construction were imported from faraway St. Louis. They are said to have cost 75 cents each.

Removal of this historic building compels the moving of the four historic forts—Rouge and Gibraltar, Douglas and Garry, Conflict between the old northwestern company and "Bay" services caused many; ceding of government to the young country; the insurance, led by the old Louis Riel, and its collapse with the arrival of Col. Wolsey's troops.

Little now is left of the buildings around which the old Red River settlement was founded. Old Fort Garry, above the site of which workmen have so busily engaged in the work of demolition, disappeared in 1882. Only the front gate, which stands in a little park nearby, remains of this historic group of buildings.

Small Pear Cause Strike

Shelters In Covent Garden, London, England, Objected To Pay

Pea-shellers in Covent Garden, London, England, rejected to pay because the peas were too small. Nearly 70 women employed by William Bailey, whose firm supplies peas to restaurants for more than 100 years, declared that it took too many peas to fill a quart, and they were paid four cents a quart for shelling small peas as well as large. Bailey explained the economics of the pea industry, and after being out for a few days the strikers returned to work.

World's Slowest Train

Takes Week To Cover 1,651 Miles In Australia

Australia believes it has the slowest train in the world. It is the "tea and sugar" special, which carries stores from Port Augusta to settlers along the route to Kalbarrie. The schedule calls for a week to travel the 1,651 miles and a week for the return trip. Practically the only passenger is William Cowan, the railway's unadventurous missionary, whose "parish" covers the entire line. He carries hundreds of newspapers for distributions on each trip.

More Gold Salvaged

The Italian salvage ship "Artiglio II," has departed at Plymouth, England, a fourth cargo of gold retrieved from the sunken liner "Egypt." The latest haul was the equivalent of \$450,000. This makes the total salvaged \$3,250,000 out of \$5,000,000 in bullion in the Egypt's strong room when she sank in 1922.

Gold Stamped In B.C.

Old gold workings near Kennedy Lake, on the west coast of Vancouver Island, are being prospected again, it is learned, and a small stampede has resulted, leaving at least one small canyoneer short of help. The department of mines has had no advice from the district.

The game of badminton, then known as "Poonie," was played in India for centuries before it became known to the English in 1873.

Commodity prices in Japan are advancing.

"Where is your pocket book?"

"What impudence, waking a man at two in the morning for a trifle like that!"—Luigi Giarola, Leipzig.

FANCIFUL FABLES

Wheat Exporting Countries Are Keenly Competing For World's Market Of 800 Million Bushels

The following article is by H. G. L. Strang, Director, Research Department, Searle Grain Co., Winnipeg, Manitoba.

"The world produces each year and consumes in round figures about 4,500 million bushels of wheat. These figures do not include China, which it has been roughly estimated produces and consumes about 600 million bushels. Therefore, the total amount of wheat produced and consumed by the entire world is probably in excess of 5,000 million bushels per annum.

Most of this wheat is consumed in the country in which it is produced, some countries, however, produce less than they require and so have to import wheat and wheat flour. Some other countries produce more than they can consume and so they have wheat and wheat flour for export sale. The amount of wheat which is thus imported and exported, most of it across the seas or which enters into international trade—is between 750 and 800 million bushels each year. This is the market and the only market that is available for the wheat that Canada cannot consume at home and which she has to sell abroad.

Canada's average wheat production for the last ten years has been 399 million bushels per annum. Her export or sales abroad for the same ten years have averaged 281 million bushels per annum in the form of wheat and wheat flour, or about 70 per cent. of her total production of wheat. The amount she has exported as wheat has averaged 237 million bushels per annum, and as wheat flour 43 million bushels per annum.

The total world's export wheat market is slightly under 800 million bushels per annum. About 20 different European countries usually import this wheat. About one-fifth of this total is imported by countries outside of Europe.

Of the European importers Great Britain is the largest, averaging about 219 million bushels each year of wheat and wheat flour, but some of this is re-exported from the United Kingdom to other countries.

The wheat exporting countries, who are keenly competing for this world's market, consist of Canada, the Argentine, U.S.A., Australia, Russia, the Italian States and Hungary, India, North Africa, Chile, and sometimes others, stated above in the order of the quantities they export.

The average exports per annum for the last seven years for each country are shown herewith and the estimated export for the present year is shown in brackets:

Canada, 281 million (300); Argentina, 148 million (142); U.S.A., 151 million (120); Australia, 700 million (525); Russia, no average, last year 63 million, this year 70 million; other exporting countries, 25 million (75). These exporting countries that are able to offer for sale a higher quality wheat than the average, or who produce the average quality and offer it for sale at less than the average price, will retain at least their proportion of the 800 million bushels world's wheat market."

Only One Ever Used

United States Shining Six Ships Which Cost Millions

Six concrete ships which have been anchored in the Mississippi River, New Orleans, are to be towed to the mouth of the Griviera River in Mexico and sunk as a breakwater.

The ships, only one of which was ever used, were built by the United States shipping board during the world war at a cost of approximately \$1,000,000 each. They are 500 feet in length and have a 35-foot beam.

They were never placed in operation because it was found they were not suitable for commercial use. They carried 12 per cent. less cargo than steel ships of the same tonnage.

Observed Motion Law

Justice has taken time out for ancient Motion Law, thereby permitting one of the faithful to have his bath before awaiting in the Koran. An assault case in general session, New York, was held over a day when Asid All objected taking out his bath. A puzzled judge bowed to the Motion law, but warned Asid to be ready to testify in the assault trial of Mahorok Ali, 36.

By Ruth Rogers

AN IMPORTANT UNDER-ENSEMBLE THAT FITS THE FINEST APPEARANCE

Here's a pattern that includes panties to match your slip. Think of the time you have so often wasted trying to buy a slip and panties that match.

You can make this darling set in a single morning. It's simplicity itself. It's surprising how little it will cost you.

The slip, cut on princess lines—a few seams to be joined—finishes the look and hem with lace. The panties have a fitted yoke and circular legs, not full. The elastic trimmings with narrow lace to match the lace on the slip.

It's very effective in pale pink crepe silk with acuri lace.

Style No. 846 is designed for sizes 12, 14, 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40, 42, 44, 46, 48, 50, 52, 54, 56, 58, 60, 62, 64, 66, 68, 70, 72, 74, 76, 78, 80, 82, 84, 86, 88, 90, 92, 94, 96, 98, 100.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

JOHN BULL KICKS OFF

Now that the Ottawa Conference is over, negotiations will be opened at once for fresh commercial treaties with foreign powers, our new bargaining power coming into play for the first time.—News of the World, London, Eng.

Works Years On Scales

Wonderful Pair Has Been Designed For Weighing Earth

After seven years of laborious work Dr. P. L. Heyl has completed a wonderful pair of scales, designed for weighing the earth. You might expect the scales for this purpose would be of tremendous size. Actually they are quite tiny, and the most important part of them is a tungsten wire one-thousandth of an inch in thickness. So delicate is this balance that it is kept in a basement room, and protected from vibrations by treble walls.

We cannot, of course, weigh the earth as a whole. A method which has been used with success is to measure the gravitational pull exercised by comparatively small objects whose weight is known. The pull the earth exerts upon the moon and upon its other neighbors in space can be found, and from this its weight may be calculated by comparison with the results obtained in the laboratory.

By means of his tiny scales, which he calls his "cosmic balance," Dr. Heyl finds that the earth reaches the very respectable figure of six thousand trillion tons, or if you like to put it in figures, six followed by twenty-one noughts.

Role Of Gay Nineties

The bicycle built for two is just a modern convenience for Bernard Beck and Neil Van der Veer. They recaptured the relic of the gay '90s at Harvey, Ill., their home, and rode it to Mount Vernon, Iowa to visit Uncle E. C. Forrest. They averaged 30 miles a day for the 2,035-mile trip, which included a eight-seeking tour of Iowa. Their expenses were \$3.

Leads Head Improvement

The Carrot River Valley Association again takes the honors with the high average production for hard iron. The improvement was in Saskatchewan for the last month in records kept by the government. Edmund Herd, of Melroth, holds the record with 56.6 pounds of butter fat per cwt in his herd of nine Holstein-Friesians, according to announcement recently.

IS THE RULE OF RUSSIA'S RED CAESAR TOTTERING?

RED ARMY AT HOME OF MOSCOW LEADERS

COMMISSAR VOROSHILOV LEON TROTSKY

According to observers of the political situation in Soviet Russia, Joseph Stalin, the supreme dictator who has virtual powers of life and death over the citizens into which he sent Leon Trotsky, former Commander of War and co-founder with Nikolai Lenin of the New Russia. Reports of the impending upheaval reached London, England, following the discovery of a plot to assassinate the dictator in Moscow. It is said 120 persons, including many high officers of the Red Army, were arrested. One of these allegedly implicated in the plot, Commissar of War Voroshilov, is said to be the new leader of the opposition against Stalin, who will, in the event of the latter being ousted, grasp the dictatorship. Stalin's fall is said to be due to the unsatisfactory manner in which he has piloted the voyage of the good ship Five-Year Plan. It is reported that erstwhile supporters of Stalin are beginning to believe that Leon Trotsky knew where he was when he accused Stalin of mismanagement of the entire affair. So far the only Red leader who has succeeded in retaining his popularity is Nikolai Lenin, who lies in his great sarcophagus in Moscow's Red Square, the idol of millions of worshipping Russians.

Production Of Gold In Canada Has Shown Remarkable Increase During Last Seventy-five Years

"Gold is where you find it"—Canadians have been finding it in such increasing quantities in the last 75 years that the Dominion now ranks as the second greatest producer of the precious metal among the countries of the world.

A booklet prepared by A. H. A. Robinson and issued by the Department of Mines tells of the strides taken by this industry, one that did not feel the depression and never failed to find a market for its product.

In gold fields and prosaic adventures that reflect nothing of the historic "gold rushes," the "heart-breaking" travel of the pioneers of the Klondike or the hectic life of the mining camps, the record tells of the increase of Canada's output from 24,000 fine ounces valued at \$705,000 in 1858, to 2,695,000 ounces—valued at nearly \$60,000,000 in 1931.

In 1850, after a steady increase from 1823, Canada's stepped into second place among the world producers, supplanting the United States. In that year, Canada's output was 21,000 fine ounces, valued at \$705,000. One year later, the United States closed third at 21,000.

South Africa, leader among gold producing countries since 1905, has forged ahead with only slight occasional setbacks until the figure was 17,176,351 in 1930.

In 1931 Canada took a better grip on second place with 2,695,219 fine ounces. The United States produced 2,191,851 ounces and South Africa, still increasing its output, 10,474,145.

Gold is found in every province of Canada except Prince Edward Island, but the province of Ontario is now the heaviest producer. Of the 1931 production Ontario accounted for 78 per cent., principally from the mines at Porcupine and Kirkland Lake. Quebec produced 11 per cent. of the total, British Columbia 6 per cent., Manitoba 4 per cent., and the balance from Yukon territory, Nova Scotia and Alberta.

Ranking with coal as the two most important mineral products of the Dominion, gold took the lead in 1931 when the value of the yellow metal produced in this country exceeded the value of coal for the first time.

Changing conditions and changed methods have written the history of gold mining in Canada, its rise and decline and second rise to even greater heights.

Placer or alluvial deposit mining which produced \$23,000,000 worth of gold in 1900, has given way to ore mining, the main source of the precious metal today. At present the average gold recovered from alluvial sands averages \$1,000,000 p.p.r.

At the present time companies working alluvial deposits are located as follows: Alberta, 1; British Columbia, 35; Yukon Territory, 12; Nova Scotia working gold ore mines; Nova Scotia, 8; Quebec, 20; Ontario, 35.

Manitoba, 5; Saskatchewan, 1; British Columbia, 33.

In a brief history of the use of gold the booklet tells of the bloody yet romantic phase the metal has played in the life of mankind as far back as history reveals. "The object of man's stupor from the earliest times, gold has been, perhaps, more influential than any other metal in shaping the course of human history," says the introductory paragraph.

"The lure of gold has drawn men to the most remote corners of the earth and has thus paved the way for settlement and civilization in new countries. It has been a fruitful source of wars and of many other of the strenuous activities, both good and evil, of the human race."

Of little commercial value, gold for ornamental purposes, except for the industrial use of the metal may be put.

Valued at first as an ornamental substance of some rarity it quickly became a common medium of barter, then a medium of exchange for iron, corn, oxen, cloth, skins and shells. But all these other mediums passed into disuse while gold remained in the market for its use in high esteem until finally it became the accepted standard of value throughout the greater part of the civilized world.

As a matter of prosaic fact the only industrial use of the metal at present, apart from its ornamental value, is in the manufacture of pen nibs, and fillings for teeth. But it remains the only substance that is freely accepted for all services and commodities in all parts of the globe, the one commodity the market for which is never glutted.

While gold is found nearly everywhere, it is not an abundant metal, and its recovery, in many instances, is too expensive to make it a profitable undertaking. Its scarcity may be explained when it is realized that if the entire gold production since Columbus discovered America in 1492, were cast in a solid cube, an edge would measure only 35 feet.

Canadian gold discoveries date back to 1825 or 1826 when placer gold was found in the Klondike River in Yukon Territory. But no real stamp was made to recover it until 1901.

When the gold was recovered by the rush of gold seekers to California in 1848 and in Australia in 1851, Canada was "left out in the cold" and important discoveries were made in British Columbia. This was followed by similar discoveries in the Yukon. At the same time 1885 the principal output came from British Columbia. The Chaudreux placer mines in Quebec were estimated to have yielded \$2,000,000 between 1860 and 1876.

In 1886 the discovery of rich gravel in the Klondike River in Yukon Territory brought on a period of intensive gold mining in Canada. Between 1895 and 1905 the total gold production was more than \$100,000,000 from the Yukon alone. At the same time the industry underwent great stimulation in British Columbia and Nova Scotia. The peak of this development was reached in 1900 when the total Canadian output was 2,550,000 fine ounces of gold, the largest amount recorded for any one year up to that time.

Then production fell off until 1907 when it was only 405,317 fine ounces.

Discoveries at Porcupine and Kirkland Lake brought on the greatest production the country had yet known. These were in 1909 and 1912 respectively. The success of these enterprises led to the tendency to seek their home territories for similar resources with the result that Manitoba and Quebec came into the picture. The discovery of gold at Rouyn, Quebec, and developments there made Quebec the second largest producer among the provinces. Finds in Manitoba transformed what was previously looked upon as a purely agricultural area, into what approaches British Columbia as a source of minerals.

Porcupine and Kirkland Lake remain the most important sources of gold yet found in Canada and give promise to be the predominating factors in the production of production for years to come.

In 1930, the last year for which reasonably complete world figures are available, the United States of America contributed about 33.5 per cent. of the world's total gold production. Canada had about 10.43 per cent., the United Kingdom 8.5 per cent., Australia 8.5 per cent., and Australia about 2.2 per cent.

Landed Not Impressed
The actor was in trouble about his rent. The landlord called, meeting pressure. "Look here," said the tenant, "you ought to be glad to have a fellow like me in your flat. In a year or two's time people will be pointing to this house and saying 'Jones the actor used to live here'." "Mister," said the landlord, hopelessly unimpressed, "if you don't pay up, people will begin pointing tomorrow."

Milk is the most complete food supplied by nature.

"Why are you so happy?"
"My mother-in-law insisted on coming with me and I have lost her."
Hummel, Hamburg.

Eyes examined at the hotel,
Oyen, on Saturday, October 8.
E. J. Anderson, B.Sc., in atten-
dance.

The Chautauqua committee
will admit all school children in
Oyen and Oyen district to see
Sue Hastings' Marionettes on
Thursday afternoon (Oct. 13)
free of charge.

The annual bazaar and chick-
en supper of the Oyen Ladies
aid will be held in the basement
of the United Church on Satur-
day, October 29. The bazaar
opens at 3 o'clock. Supper will
be served from 5.30 p.m.

Wanted—Married man for
winter to do chores. Separate
house. Phone 1214. John A.
McArthur, Oyen.

Mr. Fred MacKay of Onefour
P.O., Alta., brother of Mrs. F. E.
Neid, arrived in Oyen last Sun-
day, with a wagonload of ef-
fects. Mrs. MacKay followed on
Tuesday with a truckload of ef-
fects. Mr. and Mrs. MacKay are
residing on Mr. F. E. Neid's
farm north of town.

Mrs. G. A. Morrison left yester-
day for the coast, where she
will spend the next three weeks.

Mr. and Mrs. John Reynolds
and family, who left Glenada
district last fall for Eaglesham,
and returned here this fall dur-
ing harvesting, left last Thurs-
day to return to their home.

Monday, October 10, Thank-
sgiving day, is a Dominion holi-
day. Stores will be closed all
day.

Born—To Mr. and Mrs. Don-
ald McKay of Oyen, on Wed-
nesday, October 5, 1932, a daugh-
ter.

Mr. and Mrs. Thos. Lees and
sons Bob and Andrew, motored
to Calgary, last Friday. Bob
remained in the city to resume
his studies at "Tech". Mr. and
Mrs. Lees and Andrew returned
to Oyen Sunday, accompanied
by Mrs. E. N. Charbonneau, who
is a guest at the home of Mr.
and Mrs. J. C. Desso.

Mrs. R. J. Clancy of Walker-
ton, who was accompanied here
by her daughter, and has been
the guest of her brother, Mr. H.
J. Desmond since Wednesday
of last week, left this morning
to return home in Ontario.

Mr. William Desmond of Ker-
robert, Sask., was a Sunday vis-
itor in town.

Two weddings of local inter-
est have recently taken place,
but the News has not yet re-
ceived particulars. Miss Muriel
May was recently married in
Calgary and Miss Angelina
Hendall was married yesterday.

Mrs. Frank Love, Haven, has
received word of the death of
her sister Mrs. W. Elder, Brechin,
Scotland. Mrs. Elder was
admitted to the Brechin Infirmary
in August to undergo an
operation, but her failing
strength prevented the opera-
tion being performed. She was
removed to her home at 1 Vic-
toria Place on September 14,
and died the following day,
Thursday, September 15, 1932.
The deceased leaves to mourn,
her husband, one daughter and
four sisters.

The annual convention of
teachers of the Hanna and Oyen
inspectories will be held this
year at Hanna on Thursday and
Friday, October 6 and 7. Mr. F.
King of Drumheller is pres-
ident of the teachers' organiza-
tion and Miss Alice Nelson of
Hanna, secretary.

School will be closed here
Thursday and Friday while the
teachers attend the annual con-
vention, and will also be closed
Monday, Thanksgiving Day.

sion free. Collection taken to
meet hall rent.

Recipe for Making Men

One red blooded boy
Parents' loving care
Outdoor exercise

Ingredients

Some study (not too much)
Reasonable amount of work
Good food (plenty of Robin
Hood bread)

Method

Mix work and play with study. Combine wisely under
direction of loving parents. Add muscle building foods...
plenty of bread made from Robin Hood flour. Rear with
patience and understanding. Turn out at 21, a credit to
parents. This recipe makes one man.

ONLY a mother knows the painstaking care required
to raise a boy. She bears the responsibility of
educating him and developing his body from babyhood
so that he will be equipped to make a comfortable living.
In times like these, mothers have to sacrifice in order to
give their children the advantages of a normal youth.
They cannot slight the mental and moral training of
their children, nor can they handicap the child through
lack of good nourishing food. Since bread is essential,
smart mothers know how foolish it is to economize on
flour when even the best is inexpensive.

Prairie mothers have considered Robin Hood flour
the Standard of Excellence for more than a generation.
It remains today the flour in which you can put your
trust. Robin Hood is CLEAN, PURE and of highest
food value. It is the safe flour to use "for making men."
